Bottle Filler

**OASIS' CONTACTLESS BOTTLE FILLER
has become FREE STANDING.**

The Contactless Free Standing Bottle Filler uses infrared sensors for an easy, touch-free dispense. Eliminating any concerns of cross-contamination from pathogens and viruses. Providing users with quick and easy water from a safe source.

Freshield, a silver-based antimicrobial compound used in it's moulded components provides end-users with an added layer of safety; by reducing the growth of micro-organisms and mildew to protect the surfaces from discoloration, odours and degradation.

Available with Quasar UVC-LED. Quasar disinfects the water when it is being dispensed, eliminating the chance of recontamination and reducing over 99.99% of pathogens.

Non-refrigerated, refrigerated, and refrigerated with Quasar UVC LED units are available.
